

An injection for Covid 19.

Covid 19

makes

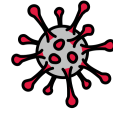

people

very

sick.

Covid 19

stops

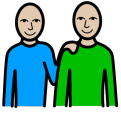

me

being

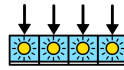

with

friends,

going to school

everyday

and

stops

me

visiting

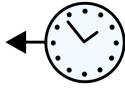

grandparents

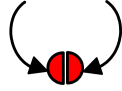

and family.

Doctors

have

made

a vaccine

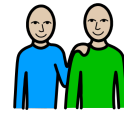

to

keep

me,

friends

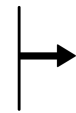

and

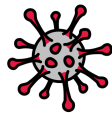

family

safe

from

Covid 19.

The vaccine

is an

injection

in

my

arm.

When

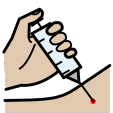

I

have

my

injection,

it is to

keep

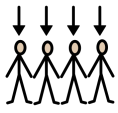

me

safe.

When

everyone

has

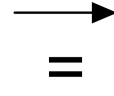

the

vaccine,

I

will be

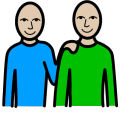

able

to be

with

friends,

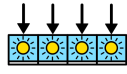

go back

to

school

everyday

and

be

with

grandparents

and families.

I

like

being

safe

and

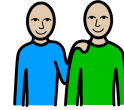

healthy

with

my

friends

and

family.
